La **REMOIN** s.r.l. è un'industria specializzata nella progettazione e costruzione di **scambiatori sanitari a fascio tubiero a doppia piastra tubiera (DTS)** realizzati in modo tale da evitare contaminazioni del fluido primario e fluido secondario.

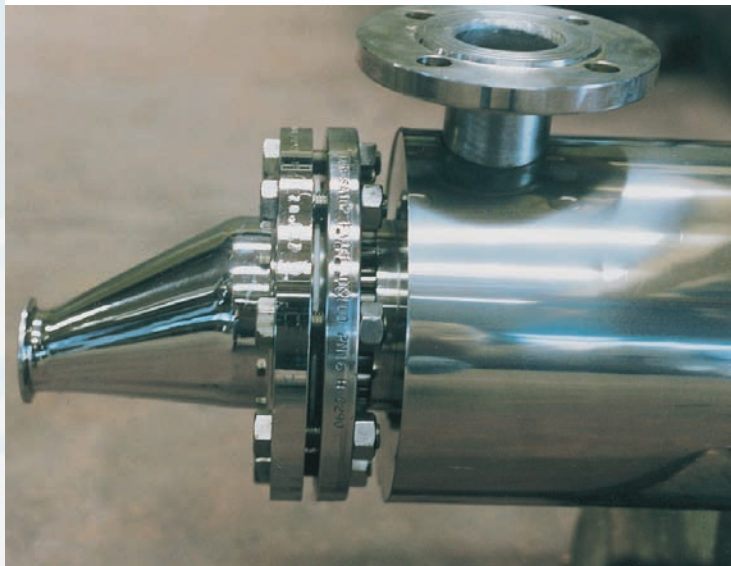

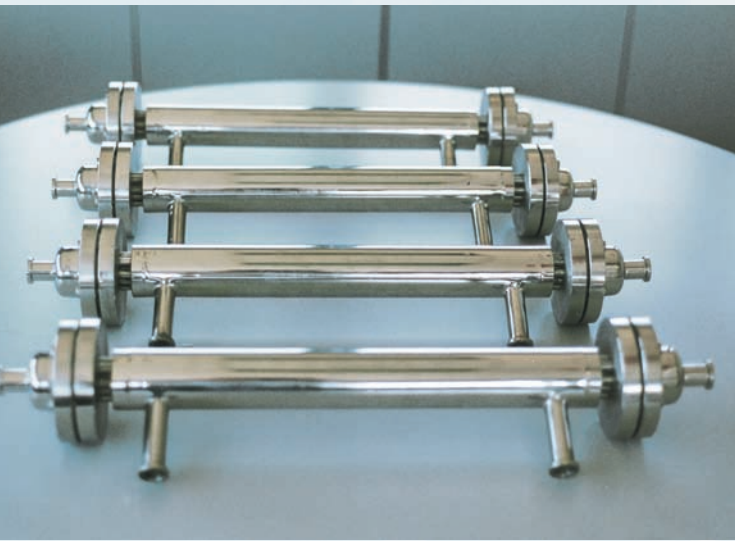

Esecuzione verticale od orizzontale, riscaldati o raffreddati, con una combinazione alternata delle due funzioni a passaggio singolo, doppio o multiplo, completamente autodrenanti, isolati e rivestiti con Acciaio inox AISI 304 completamente sigillati.

Particolare testata a due o più passaggi
Detail of a head double or multiple passage

SCAMBIATORI SANITARI DTS SANITARY DTS EXCHANGER

Scambiatore di raffreddamento per prese campione di vapore puro
Cooler exchanger for sample point

Particolare testata a passaggio unico
Detail head single passage

REMOIN s.r.l. is an industrial company specialized in the research, design and construction of **sanitary heat**

exchangers with double plates (DTS), builded to avoid contaminations between primary and secondary fluid.

Realized in vertical or orizzontal, heated or cooled or with a combination of functions.

Single, double or multiple passage, and autodrained, isolated and steel-dad in AISI 304, completely sealed.

Type of materials:

- Stainless steel AISI 316L/304L
- Hastelloy
- Sanicro 28
- Titanium

Application fields:

- Pharmaceutical
- Cosmetic
- Biotechnologic
- Dairy

Quality controls:

- Roughness
- Penetrant liquids
- Radiographic tests
- Internal visual controls
- Boroscopic
- Material certificate ASTM 3.1B

Technical data:

- Rectilinear pipes with double fixed plates

Qualifications:

- ASME, PED97/23/CE

Surface finish:

- Internal: mirror polished $Ra \leq 0,4$, optional electropolished
- Estemal: polished or mirror polished

Type of employment:

- Distilled and bidistilled water
- Purified water
